

AREEB TAYYUB

1525 Evenside Crescent, Mississauga, ON L5M 3Y3 | 437-772-1422 | areebtayyub1998@gmail.com

Professional Summary

Detail-oriented and results-driven IT professional with hands-on experience in technical analysis, QA testing, system support, and web application development. Adept at using technologies such as .NET, AWS, SQL, and Angular. Demonstrated ability to manage user support, ensure system reliability, and lead QA efforts for complex software projects. Seeking to contribute my skills in a dynamic IT or QA Analyst role.

Technical Skills

- Languages & Frameworks: C#, .NET (MVC, API), Java, JavaScript, Python, Angular
- Databases: SQL Server, MongoDB
- Tools & Platforms: AWS (EC2, VPC, NACL, Security Groups), Visual Paradigm, Postman, xUnit
- Testing & QA: Unit Testing (xUnit), Manual Testing, Test Case Creation, Scenario Coverage
- Version Control: Git
- Operating Systems: Windows, Linux

Work Experience

Akkodis: Biometrics Technician

January 2025 – Present

- Installed and configured biometric systems (fingerprint, facial recognition) for optimal performance
- Integrated biometric software with existing IT infrastructure and conducted functionality and security testing
- Collaborated with IT and security teams to ensure secure network integration of biometric data
- Delivered technical support and end-user training on biometric system use and maintenance
- Ensured compliance with federal security standards, privacy laws, and internal protocols

RCMP Central Help Desk: Technical Analyst

September 2022 – April 2024

- Managed user access via Active Directory (AD) and VPN, ensuring secure connectivity
- Created detailed support tickets and documentation to assist Level 2 support
- Troubleshoot Windows OS and legacy application issues, achieving consistent resolution rates
- Delivered clear, step-by-step guidance to non-technical users, earning positive feedback
- Juggled on-call and online support responsibilities in a high-paced environment

BuilDesign: Water Meter Technician

October 2017 – May 2020

- Installed and configured water meter systems and integrated them with online monitoring tools
- Resolved connectivity and data flow issues to maintain system reliability
- Designed efficient communication layouts for large-scale property systems

Projects & Academic Experience

Capstone Project - Youth Sewing Business Web Platform

Lead QA Tester | Sheridan College

- Designed comprehensive test plans and test cases for all functional requirements
- Performed rigorous unit testing using xUnit to cover valid, invalid, and edge cases
- Collaborated with developers and stakeholders to refine UI and system logic
- Conducted manual testing for UI/UX accuracy and functionality

Education

Sheridan College: Information System Engineering

September 2020 – December 2023

Graduated with Honours

Related Programs: Advanced .Net Server-Side Tech, Data Structures in C

Soft Skills

- Strong time management; balanced full-time work while completing diploma with honours
- Excellent communicator; able to explain technical issues in user-friendly language
- Critical thinker and problem solver; quick to identify and resolve software/system bugs
- Collaborative team player; successfully led QA efforts in cross-functional teams
